LID + CLIP + BAND

TRANSPARENT DOUBLE WALLED TRAVEL CUP WITH BAND

Double wall reusable coffee cup which will remain cool to hold. It has a silicone band and a secure screw on lid with a splash proof flip closure. The cup is manufactured from crystal clear AS material and the lid is polypropylene. Both materials are BPA free and can be recycled. The lid, flip closure and band can be mixed and matched in any colour combination from the colour palette at no extra cost. Handwashing is recommended.

SUPPLIED IN CARD BOX.

CAMPO GLORY TRAVEL CUP CLEAR (350ml)

MIX AND MATCH

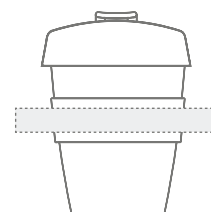

LID + CLIP + BAND

TRANSPARENT TRAVEL CUP WITH BAND

Design inspired 350ml single wall reusable coffee cup. It has a secure screw on lid with a silicone seal and a splash proof flip closure. Silicone band is printed and applied to cup for comfortable and safe hold. The lid, flip closure and base are manufactured from food grade polypropylene. The Campo Glory Travel Cup is BPA free and the materials used are recyclable, hand washing is recommended. The colours of lid, flip closure parts and band can be combined to reflect your corporate colours.

CAMPO COSMOS TRAVEL CUP (350ml)

MIX AND MATCH

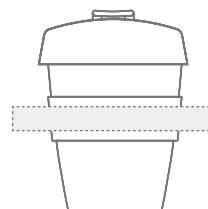

SOLID NATURAL LOOK TRAVEL CUP WITH BAND

Design inspired 350ml reusable coffee cup that has an incredible story to tell. It is manufactured from a 50/50 blend of natural rice husk fibre and BPA free polypropylene. Rice husk is a waste product with little value and the agricultural industry often dispose of it by burning which creates air pollution. Using it to make a reusable coffee cup reduces the amount of plastic, accelerates its biodegradability and produces a trendy natural look. It has a heat resistant silicone band and a secure screw on lid with a splash proof flip closure. The flip closure and band can be mixed and matched in any colour combination from the colour palette. Handwashing is recommended.

SUPPLIED IN CARD BOX.

GENERAL INFORMATION

We make every effort to ensure that the pricing and product information herein is accurate, but please consult our website for the most up to date information. Please note that the prices and product information appearing on our website takes precedence over that which may appear in printed publications. E. & O. E. (Errors and omissions excepted)

Product Dimensions

Product dimensions may vary from shipment to shipment. Please check our website for latest updates.

Terms And Conditions

Images & Branding

Product images displayed do not show the products at actual size and may differ from the actual product, the logos and imprints featured are for illustrative purposes only to illustrate branding options. Branding areas vary for the various branding processes, a template which shows the exact branding area will be supplied to you during the order process. Prices vary depending on order quantity, branding process, branding locations and number of colours branded, a quote matching your exact requirements will be provided when we receive your enquiry. The logos used here are the property of their owners and represent no endorsement of this catalogue or its contents.

Product colours illustrated herein are matched as closely as the print process will allow and should be considered as approximate. Actual product colours can vary within production batches and from shipment to shipment due to variations at the stage of manufacturing and as this is beyond our control we give no guarantees whatsoever in terms of exact product colours and our goods are supplied on this basis and we do not accept returns because of product colour variations. If product colour is important to you, we suggest that you ask to see samples of items currently in stock in order to satisfy yourself that this meets your requirements. Due to differences in monitors and screens (smartphone, tablet, pc etc.), please be aware that colours of product may not be displayed properly.

Product Specification

Product specification requirements in Promotional Products vary considerably from client to client, for some the lowest cost is their priority for others product quality is most important. We aim to find a balance between price and reliability thus offering good value. If product specification and usability is important that you, we strongly recommend that you ask to see samples of the products prior to placing an order, as we cannot accept returns of products after they have been branded.

Branding Process

Rotary Screen Print

Screen printing is achieved by forcing ink through a fine mesh screen with a squeegee onto the product and is ideal for branding flat or cylindrical objects.

ADVANTAGES

- Large print areas are possible on both flat and cylindrical products.
- Close PMS matches are possible on white or light coloured products.
- Ideal for large solid areas of colour.
- Most screen print inks are quick drying and can be shipped immediately after printing.
- Metallic gold and silver is available.

LIMITATIONS

- Halftones and very fine lines.
- Close PMS matches are more difficult on darker products and will only be approximate.
- Unable to print variable data.
- A set up charge is required for each colour to be printed.

ARTWORK REQUIREMENTS

- Artwork should be supplied in vector format.

Laser Engraving

Laser engraving produces a permanent natural finish using a laser to mark the product. Different materials produce different effects when engraved so to avoid uncertainty pre-production samples are recommended.

ADVANTAGES

- Higher perceived value than other forms of branding.
- The branding becomes part of the surface and is permanent.
- Gives a similar finish to etching on glassware at a much lower cost.
- Can mark curved or uneven products.
- Can produce variable data including individual names.
- The product can be shipped as soon as marking is finished

LIMITATIONS

- The size of branding areas is limited on curved surfaces.
- Fine detail can be lost on smaller products like pens.

ARTWORK REQUIREMENTS

- The artwork should be supplied in vector format.

Direct Digital

Direct to product digital printing involves the transfer of ink directly from the print heads of an inkjet machine to the product and can be used to produce full colour branding on flat or slightly curved surfaces.

ADVANTAGES

- Ideal for printing dark coloured products as a layer of white ink can be printed under the artwork.
- Only one set up charge is required irrespective of the number of print colours.
- Instant drying so products can be shipped immediately.
- Offers larger print areas on many products and can print very close to the edge of flat products.

LIMITATIONS

- Only approximate PMS colours can be reproduced.
- Some colours cannot be reproduced including metallic silver and gold.
- The size of branding areas is limited on curved surfaces.
- Larger print areas tend to be more expensive.

ARTWORK REQUIREMENTS

- Artwork can be supplied in either vector or bitmap (600dpi recommended) format.
- A 3mm bleed should be added to the artwork if it bleeds off the product.

Debossing

Debossing is produced by pressing a hot engraved metal plate into the surface of a product with a lot of pressure. This produces a permanent image below the products surface.

ADVANTAGES

- Higher perceived value than other forms of branding.
- The branding becomes part of the product and is permanent.
- The product can be shipped as soon as heat pressing is finished.

LIMITATIONS

- Has a higher initial setup cost than other forms of branding as an engraved metal plate must be made.

ARTWORK REQUIREMENTS

- The artwork should be supplied in vector format.

Flatbed Screen Print

Screen printing is achieved by forcing ink through a fine mesh screen with a squeegee onto the product and is ideal for branding flat or cylindrical objects.

ADVANTAGES

- Large print areas are possible on both flat and cylindrical products.
- Close PMS matches are possible on white or light coloured products.
- Ideal for large solid areas of colour.
- Most screen print inks are quick drying and can be shipped immediately after printing.
- Metallic gold and silver is available.

LIMITATIONS

- Halftones and very fine lines cannot be reproduced.
- Close PMS matches are more difficult on darker products and will only be approximate.
- Unable to print variable data.
- A set up charge is required for each colour to be printed.

ARTWORK REQUIREMENTS

- Artwork should be supplied in vector format.

Digital Label

Digital adhesive labels are used to brand products that cannot be branded with any other method. They are printed with a digital printing press and applied to the product.

ADVANTAGES

- Ideal for producing vivid full colour images as well as spot colour branding.
- Only one set up charge is required irrespective of the number of print colours.
- The branding can bleed off the edges of the label.

LIMITATIONS

- Only approximate PMS colours can be reproduced.
- Metallic gold and silver colours are not available.

ARTWORK REQUIREMENTS

- Artwork can be supplied in either vector or bitmap format.
- A 3mm bleed should be added to the artwork if it bleeds off the product.

GENERAL INFORMATION >>

Pad Print

Pad printing uses a silicone pad to transfer an image to a product from a laser etched printing plate. It is one of the most popular and affordable ways of branding promotional products due to its ability to reproduce images on uneven or curved products and print multiple colours in a single pass.

ADVANTAGES

- Ideal for printing on curved or uneven products.
- Close PMS matches are possible on white or light coloured products.
- Metallic gold and silver is available.

LIMITATIONS

- Halftones cannot be consistently reproduced.
- The size of branding areas is limited on curved surfaces.
- Unable to print variable data.
- Close PMS matches are more difficult on darker products and will only be approximate.
- Minor print distortion may occur on uneven or curved surfaces.
- Pad print inks require a curing period before the product can be shipped.
- A set up charge is required for each colour to be printed.

ARTWORK REQUIREMENTS

- Artwork should be supplied in vector format.

Sublimation Print

Sublimation print is used for branding products that have a special coating on them or fabrics suitable for the sublimation process. A transfer is produced by printing sublimation ink onto transfer paper and then heat pressing it onto the product.

ADVANTAGES

- Sublimation ink is actually a dye so there is no ink build-up on the finished print and it looks like part of the product.
- Ideal for producing vivid full colour images as well as spot colour branding.
- Can print variable data including individual names.
- Only one set up charge is required irrespective of the number of print colours.
- The branding can bleed off some products.

LIMITATIONS

- Can only be used for suitable products with white surfaces.
- Only approximate PMS colours can be reproduced.
- Some colours cannot be reproduced including metallic silver and gold.
- When printing large images some minor imperfections may appear in the print or around the edges of it. These are unavoidable.

ARTWORK REQUIREMENTS

- Artwork can be supplied in either vector or bitmap format.
- A 3mm bleed should be added to the artwork if it bleeds off the product.
